K4 Semi Automatic Bollard

BLG 02 SA

BLG-02-SA

K-4 certified bollard

For areas where there is a need for vehicles access control on a regular basis and yet maintain the option to block the area, a Semi-Automatic Bollard system might be the best choice.

These systems are designed to allow access, or block access quickly and with very little effort.

A Semi-Automatic Bollard system is simple to operate, requiring only the turn of a key and a light pull to store or deploy.

Main highlights:

- K4 crash certified
- Optional LED light, stainless steel coating
- Operation by key
- Modular design
- Maintenance free
- Operation via gas spring
- Finish suites any outdoor conditions (S.S, galvanized, polyuria)

Technical details

Product	BLG-02-SA
Height above road (H)	700 mm / 27.5"
Foundation depth	1300 mm / 51"
Internal casing (I)	1210 mm / 48"
Bollard internal Overlap (O)	300 mm / 12"
Bollard diameter (D)	220 mm / 9"
Protection level	ASTM F2656 07-M30-P1-Zero penetration. Bollard continue to work after crash
Options	LED lights, Hot deep galvanized with stainless steel cover.
